

AI Response Quality Evaluation Report

Multi-Agent RAG-Based AI Response Quality Evaluation System

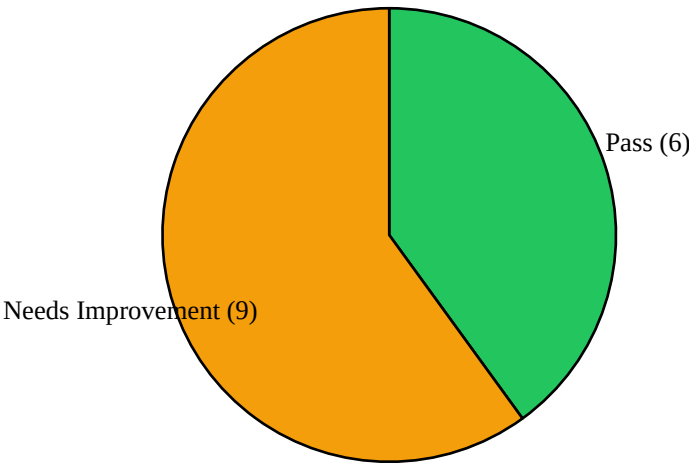

1. Project Details

Project	AI Response Quality Evaluator
Evaluation Architecture	Multi-Agent Evaluation + RAG
Evaluation Dimensions	Accuracy, Relevance, Completeness, Hallucination
Evaluation Type	Single / Batch
Report Generated	12-08-2026 12:46:37

2. Batch Evaluation Summary

Metric	Result
Total Evaluations	15
Pass	6
Needs Improvement	9
Fail	0
Average Score	61.26/100

3. Evaluation Result Distribution

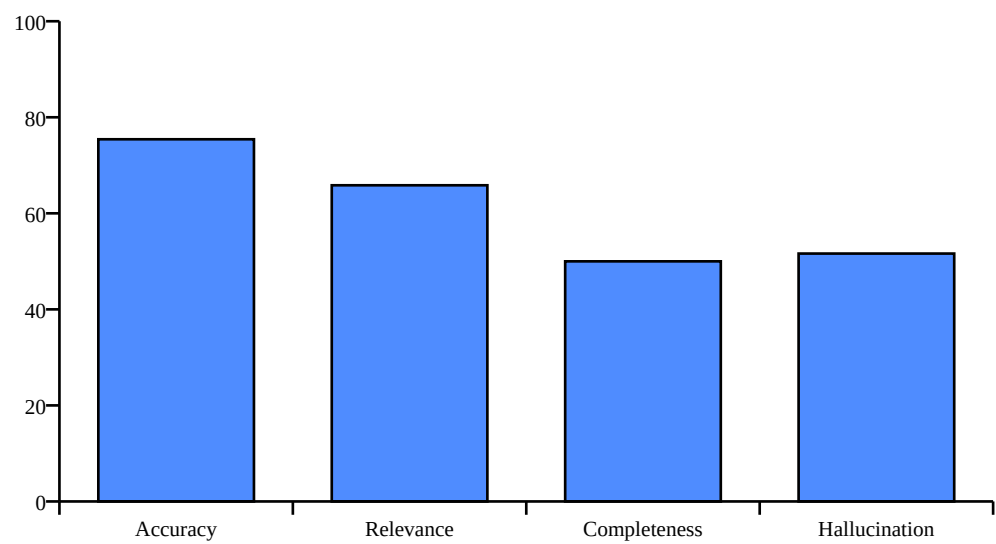

4. Dimension-wise Evaluation Scores

Dimension	Average Score
-----------	---------------

Accuracy	75.42/100
Relevance	65.84/100
Completeness	50.0/100
Hallucination Score	51.62/100

Dimension Score Comparison

5. Individual Evaluation Results

ID	Question	Accuracy	Relevance	Completeness	Hallucination	Final	Verdict
15	Who discovered gravity?	44.31	57.52	66.67	55.69	53.2	Average
14	What is Artificial Intelligence?	89.22	74.57	50.0	38.27	70.25	Good
13	What causes malaria?	85.46	62.26	33.33	63.29	56.88	Average
12	Who invented the telephone?	76.97	61.07	50.0	68.7	57.12	Average
11	What is Artificial Intelligence?	89.22	74.57	50.0	38.27	70.25	Good
10	What is Artificial Intelligence?	89.22	74.57	50.0	38.27	70.25	Good
9	Who discovered gravity?	44.31	57.52	66.67	55.69	53.2	Average
8	What is Artificial Intelligence?	89.22	74.57	50.0	38.27	70.25	Good
7	What causes malaria?	85.46	62.26	33.33	63.29	56.88	Average
6	Who discovered gravity?	44.31	57.52	66.67	55.69	53.2	Average
5	What is Artificial Intelligence?	89.22	74.57	50.0	38.27	70.25	Good
4	What causes malaria?	85.46	62.26	33.33	63.29	56.88	Average
3	Who discovered gravity?	44.31	57.52	66.67	55.69	53.2	Average
2	What is Artificial Intelligence?	89.22	74.57	50.0	38.27	70.25	Good
1	What causes malaria?	85.46	62.26	33.33	63.29	56.88	Average

6. Hallucinated Responses

Flagged Question 1

Question: What is Artificial Intelligence?

Occurrences: 6

Response 1: Artificial Intelligence is the simulation of human intelligence by machines.

Average Hallucination Score: 38.27/100

Verdict: Good

7. Improvement Recommendations

- Improve relevance by retrieving context that is more closely aligned with the user's question.
- Improve completeness by ensuring that responses address all important aspects of the question.
- Reduce hallucinations by improving retrieval grounding and using the hallucination evaluation agent to identify unsupported claims.

8. Overall Verdict

The evaluated responses achieved an average overall score of 61.26/100. Based on the configured evaluation thresholds, the overall batch verdict is Average.
